

I support this petition and request the FCC maintain the suggested Morse requirements for General and Extra Class Licenses. I also support the other points addressed by the FISTS petition with the following exception: I do not agree that instant re-tests should be stopped at VE sessions. I believe reasonable latitude should be given and a limit of one re-test allowed if within the time constraints of the session and such that it doesn't hinder the VE's administering other persons being tested. The bottom line decision would be at the VE's discretion, and on an individual basis. This should be clearly established and presented at each session with other testing instructions/information.
